

MyoLand

The Great Nose & Breathing Adventure!

More nose-opening breathing games to play together! Great before bed, after outside play, or anytime the nose feels stuffy.

A game by **Myo Family Health** • Play free at myofamilyhealth.github.io/myo-family-health-game

 **Before you start:** Help your nose get ready for the game! If needed, gently blow your nose or use a saline nasal spray to clear the nasal passages. A clean, comfortable nose can make nasal breathing games easier and more enjoyable.

How to use these: Pick a card, read the silly story, and do it together!  **Hold** = hold steady for the seconds shown.
 **Reps** = repeat that many times.  **In** →  **Hold** = breathe in first, then hold. Keep it playful and gentle. 

Flower & Candle

 3 times

A garden of flowers, each with a birthday candle!

Smell the flower slooowly through your **nose**, then blow out its candle through your **mouth**. Do it 3 times!

Grown-ups: Nasal inhale, slow oral exhale — the core of calm nasal breathing. Trains kids to breathe IN through the nose.

Puffer Cheeks

 In 3s →  Hold 5s

The pufferfish must puff up BIG to scare the shark!

Breathe in through your nose, then puff both cheeks full of air like a pufferfish and hold. Keep lips zipped tight!

Grown-ups: Cheek puff and lip seal after a nasal breath — builds lip strength and breath control.

Bunny Sniffs

 5 times

A bunny smelled yummy carrots in the garden!

Close your mouth and take quick little sniffs through your nose — sniff, sniff, sniff — like a bunny! Do 5.

Grown-ups: Quick nasal sniffs help wake up and clear a stuffy nose and reinforce breathing through the nose.

Buzzy Bee Hum

 Hold 5s

Help the busy bee buzz all around the flowers!

Close your mouth and huuuum like a bee — mmmmm! Feel the buzzy tickle in your nose the whole time.

Grown-ups: Humming boosts nasal airflow and nitric oxide, which helps the nasal passages feel more open.

Dragon Breath

 4 times

A friendly dragon is warming up its big breath!

Take a BIG breath in through your **nose**, then let out a big warm dragon breath through your **nose** — hmmmm! Do 4.

Grown-ups: Big nasal inhale with a long nasal exhale — practices deep nasal breathing in and out, with a slow, controlled out-breath.

Superhero Nose

 4 times

Unlock your super-sniffer powers, one side at a time!

Press one side of your nose with a finger and sniff through the other side. Then switch sides! Do 4 super-sniffs.

Grown-ups: A kid-friendly alternate-nostril breath — gently helps clear and open each nasal passage one side at a time.

MyoLand

The Great Nose & Breathing Adventure!

More nose-opening breathing games to play together — all easy to do at home with nothing but your nose.

Hold the Bubble

 In 3s →  Hold 5s

Catch a magic bubble of air and keep it safe!

Breathe in through your nose, puff your cheeks, and hold your bubble of air. Don't let it pop until the count is done!

Grown-ups: A short, gentle breath-hold after a nasal inhale — builds breath awareness and control. Keep it playful and brief.

Magic Feather

 Hold 6s

Keep the magic feather perfectly still on your hand!

Place the feather gently on your hand. Take a quiet breath in through your **nose**, then slowly breathe out through your **nose**. Don't let your breath blow it away — can you keep it perfectly still?

Grown-ups: Encourage quiet nasal inhalation and a slow, gentle nasal exhalation. The goal is to maintain nasal breathing while minimizing airflow from the mouth and keeping the feather from moving.

Nose Wiggle Wake-Up

 6 times

Time to wake up your sleepy nose!

Scrunch and wiggle your nose like a bunny — wiggle, wiggle! Then take one happy breath through your nose. Do 6.

Grown-ups: Playful nose-scrunching wakes up the face and nose and helps kids tune in to breathing through the nose.

Balloon Belly

 Hold 6s

Fill your tummy up like a big happy balloon!

Breathe in slooowly through your **nose** and fill your belly like a giant balloon. Watch it grow... then let it out **through your nose**, nice and slow.

Grown-ups: Slow diaphragmatic (belly) breathing through the nose — calming, and reinforces nasal over shallow mouth breathing.

🌟 **Playing the game grows the habit.** Each exercise appears as a silly mission on the MyoLand candy trail — kids earn coins, unlock characters, and find hidden veggie friends while they practice.
